

# ABSTRACT

5 A composite dielectric material comprising a resin  
dielectric ceramic powder dispersed therein is useful in  
the high-frequency region. A composite magnetic material  
comprising a polyvinylbenzyl ether compound and a magnetic  
10 powder is also provided as well as a flame retardant  
material comprising a polyvinylbenzyl ether compound and a  
flame retardant. These materials may be used in the  
fabrication of substrates, prepreg sheets, coated metal  
foils, molded items, and metal foil-clad substrates.
